

Tussie Mussie

This fits in a 5' wide and deep with at least six hours of direct sun.

Jasmine officinal- The classic jasmine. Small leaves and white trumpet flowers spring through early summer. It can reach 10-15' tall.

★ **Stargazer Lilly**- Large extremely fragrant flowers. Usually sold in the bulbs in Fall and spring. Each bulb produces 3-5+ pink and white flowers on a 4' stem.

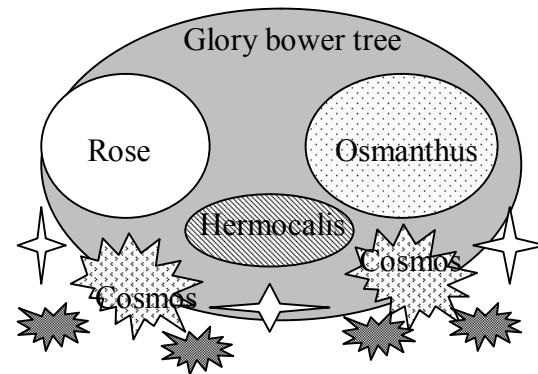

Daphne caucasia 'Summer Ice'- This daphne has small pale pink flowers that bloom Spring through Fall. The flowers have a light sweet scent. This shrub grows 4' tall/wide, and needs good drainage.

Helitrope- An annual with dark purple flowers that smell like vanilla. It can reach 3-4' tall and wide in a season with regular fertilizer.

● **Dianthus**- These small flowers have a wonderful clove like fragrance. For this design we suggest the smaller cultivars (15-30" tall) that are bicolor or pink.

Warm & Spicy

A larger combination that can fit in a space 10-15' wide and deep and 15' tall. It thrives in a south or west facing area.

Clerodendron trichotum- Harlequin Glory bower. A small tree with leaves that smell like peanut butter. In late summer, fragrant white flowers turn to turquoise berries. Reaches 15' tall and wide

● **Osmanthus delvelyi** – An evergreen shrub growing to 4-6' tall and wide. Small star-shaped, white flowers in March. Flowers have a light sweet fragrance.

Rose 'Fragrant Cloud'- Large double coral red flowers with a rich old rose scent. Grows 3-4' tall/wide.

● **Hermocalis 'Hyperion'**- Daylily. A repeat bloomer with fragrant lemon yellow flowers. 40" tall and wide.

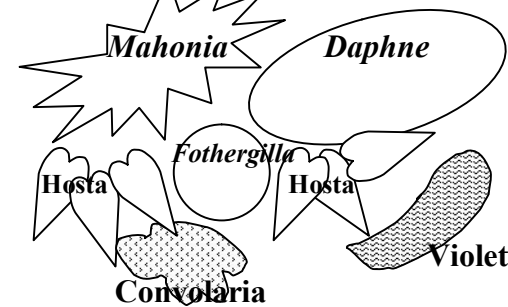

★ **Chocolate cosmos** –Deep mahogany flowers that really smell like chocolate! Grow 1-2' wide and tall.

★ **Mignonette**- A sprawling annual, with flowers that smell like raspberry

★ **Thymus 'Lemon'**- evergreen, fragrant foliage. Grows 2-6" tall, 18-24" wide.

Shady Scents

An ideal location is a 10' wide and 5' deep area that receives morning sun and afternoon shade.

Mahonia bealei- Leather leaf Mahonia. Sweet yellow flowers in late winter and early spring. Blue-green, spiky evergreen leaves. Reaches 6'+ tall.

Daphne odora marginata- Winter Daphne. Intoxicating clusters of white/pink flowers in late winter to early spring. Evergreen. Good drainage is necessary. Grows to 4-5' tall and wide.

Fothergilla gardenini – A small deciduous shrub with spectacular fall color. Spires of white puffy flowers are mildly fragrant in late spring. Grows to 2-3' tall and wide.

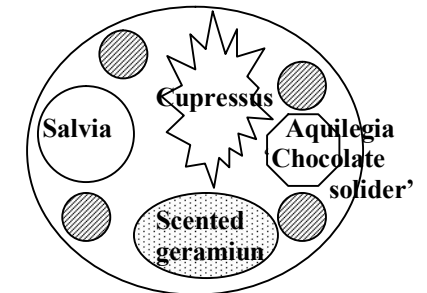

Hosta 'Fragrant Bouquet'-Apple green leaves with a yellow edge. Large fragrant whit flowers in summer. Grows 20-22" tall and wide.

● **Viola odora**- Violet. Tiny lavender blue fragrant flowers and heart shaped leaves. Small plant to 3" tall.

● **Convolaria**- Lilly of the Valley. Dainty white bell shaped flowers in early spring provide a classic fragrance. Naturalizes.

Silvery scents

The following combination can fit in a 16 to 20" container or in a small place in the ground. These plants need full sun, and winter protection.

Cupressus macnabiana- A tender conifer native to dry California. Resin glands emit a tangy fragrance.

Salvia discolor- A tender sage with olive green and silver leaves that are highly fragrant when rubbed. Iridescent black flowers in summer.

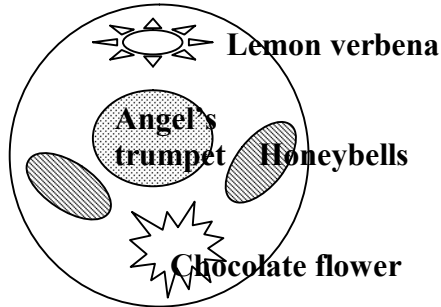

● **Scented geranium**- Many to choose from with fragrances ranging from rose to lemon. Fun foliage shapes and colors can spruce up this arrangement.

● **Aquilegia 'Chocolate Solider'**- Spring blooms are velvety brown and green with a soft, sweet fragrance. Blue green basal leaves. Perennial 1 ½ -2'.

● Annual of your choice. Cool colors would work well. We suggest a blue trailing lobelia or purple petunias.

Lemons & Bells

This combination can fit in a 20-24" container. These plants need full sun.

 **Lemon Verbena**- A tender herb reaching 1-3'. Sweet lemon fragrant leaves used in teas.

 **Angel's Trumpet, *Brugmansia***- Tropical plant with 1-2' fragrant, pendulous trumpet shaped flowers in white, yellow or pink. Fertilize once a week.

 **Honeybells, *Hermannia verticillata***- An annual with soft feathery foliage and tiny yellow fragrant flowers through summer.

 **Chocolate flower, *Berlandiera lyrata***- Yellow daisy like flowers with a green center and a fragrance of chocolate. Perennial. Silvery basal leaves.

In all these combinations, specific plants can be replaced in order to tailor the design to your needs. Keep in mind that a substituted plant will want similar cultural conditions. All plants are subject to seasonal availability. We have tried to choose plants we carry on a regular basis. Please ask for assistance if needed.

Tips for establishing new plantings

Soil preparation: We recommend adding compost to the planting area to improve drainage and fertility. Mix in the compost at a ratio of 1/3 compost to 2/3 soil. In addition, add pumice to each planting hole.

When to plant. Best planting times are midspring to early summer and early fall. Mid summer planting should be done in the cool parts of the day with ample water. Keep an eye on soil moisture for winter planting.

Water. New plants need regular water for the first two seasons to become established. In summer, water plants once a week, slowly, for an hour. Containers may need to be watered every other day depending on size and location. Frequency may be amended as the season changes.

Fertilizer. Use an all purpose fertilizer of your choice applied in spring. Follow directions on the package for application rates. New transplants can be watered in with fish and kelp to alleviate shock. Furthermore, specific bloom fertilizers help keep annuals flowering all year.

Mulch. We recommend mulching one or two times a year (spring and fall) with a fine compost. Mulching helps conserve water, improves soil, and insulates roots. Spring mulch can also be mixed with a granular all purpose fertilizer.

Fragrant Combinations

Perennial, shrub and annual combinations for fragrance.

We have chosen some of favorite fragrant plants that are readily available. This pamphlet puts these plants together to create beds with year round interest. We have also tried to show small vignettes for tiny areas. Specifics for preparing the soil and other cultural requirements are outlined on the back of this pamphlet.
