Design of the Month

New Year's Treasure

1. *Edgeworthia chrysantha*
2. *Helleborus x E. 'Monte Cristo'*
3. *Lonicera n. 'Lemon Beauty'*
4. Primula 'Blue Stripe'
5. *Carex osh. 'Eversheen'*

PORTLAND
NURSERY

Steps:

1. Fill your container 2/3 of the way with all-purpose Potting Soil such as E.B. Stone Edna's Best.
2. Mix some fertilizer into the soil in the container. We have always had exceptional results with *E.B. Stone Sure Start*.
3. Moistening the soil so that it is damp is an important step if your potting soil is old or on the dry side.
Most fresh bags of soil should take up water evenly when you water the plants.
4. Plant your container. It helps to gently loosen the root of each plant to enhance root development.
5. Fill the nooks and crannies with moist potting soil.
6. Water your newly planted container thoroughly and enjoy!

Substitutions:

Sometimes you cannot find the exact cultivated variety we have listed above. Luckily there are substitutions that will offer a similar or even preferred look.

Care and Maintenance:

The plants in this container will thrive with morning sun and afternoon shade. The Primulas and Hellebore will bloom through April or later. The Edgeworthia will begin to perfume the air with delicate yellow flowers starting in late February. Many of the plants are evergreen and look great all winter and into next spring. Water when the top two inches of soil is dry. Topdress with an all-purpose fertilizer in late April. Replace the primulas with summer blooming annuals.
