

Recipe Card for the
Container Design of the Month
Designed by Jennifer Braun at Portland Nursery

July

Design of the Month

Rose Delight

1. Tree rose "Sun Sprinkles"
2. Salvia 'Red Hot Sally'
3. Fiber optic grass, Isolepis
4. Wire Vine, Muehlenbeckia
5. Calibrichoa 'Saffron'
6. Bidens 'Goldmarie'

PORTLAND
NURSERY

Steps:

1. Fill your container 2/3 of the way with all-purpose Potting Soil.
2. Mix some fertilizer into the soil in the container.
We have always had exceptional results with *E.B. Stone Sure Start*.
3. Moistening the soil so that it is damp is an important step if your potting soil is old or on the dry side.
Most fresh bags of soil should take up water evenly when you water the plants in.
4. Plant your container.
It helps to gently loosen the root of each plant to enhance root development.
5. Fill the nooks and crannies with moist potting soil.
6. Water your newly planted container thoroughly and enjoy!

Substitutions:

Sometimes you cannot find the exact cultivated variety we have listed above. Luckily there are substitutions that will offer a similar or even preferred look. There are many types of mini tree roses available. Any red salvia, or Zinnia 'Profusion Fire' in place of the salvia. Other yellow Calibrichoa varieties, Brachyscome, or Sanvitalia would all work. A grass such as Carex 'Frosted Curls' or Blue Fescue will work in place of the Fiber Optic Grass.

Care and Maintenance:

The plants in this container will thrive with up to 4 hours of morning to mid-day sun. Water when slightly dry, being careful not to over water. Top dress and gently scratch into the surface some granular all-purpose fertilizer 3 months after planting. The annuals can be replaced in the fall with a variety of evergreens or winter bloomers.
