

Recipe Card for the Container Design of the Month

Designed by Katie Gwynn of Portland Nursery

Design of the Month

July

Pollinator Purple Paradise

1. *Agastache* 'Morello'
2. Blackie Sweet Potato Vine
3. *Pentas* 'Lucky Star White'
4. *Oreganum* 'Lizzie's Hybrid'
5. *Salvia* 'Sizzler Purple'

Steps:

1. Fill your container 2/3 of the way with all-purpose Potting Soil such as E.B. Stone Edna's Best.
2. Mix some fertilizer into the soil in the container. We have always had exceptional results with *E.B. Stone Sure Start*.
3. Moistening the soil so that it is damp is an important step if your potting soil is old or on the dry side. Most fresh bags of soil should take up water evenly when you water the plants.
4. Plant your container. It helps to gently loosen the roots of each plant to enhance root development.
5. Fill the nooks and crannies with moist potting soil.
6. Water your newly planted container thoroughly and enjoy!

Substitutions:

Sometimes you cannot find the exact cultivated variety we have listed above. Luckily there are substitutions that will offer a similar or even preferred look.

Care and Maintenance:

The plants in this container will thrive in full sun (6+ hours of direct sun per day). This combination will give color and textural interest all season long. Water thoroughly when the top 2 inches of soil are dry. The tropicals will die in winter leaving space for the perennials to grow next year. After two years the plants will become crowded. At this point separate them and plant into the garden or larger containers.
