

Recipe Card for the  
Container Design of the Month  
Designed by David Green at Portland Nursery

Design of the Month

June 2009

Summer Drama

1. *Solanum atropurpurea* 'Malevolence'
2. *Coleus* 'Mississippi Summer'
3. *Scented geranium* 'Prince Rupert'
4. *Sedum* 'Angelina'
5. *Calibrachoa* 'Mini Famous Peach'

PORTLAND  
NURSERY

Steps:

1. Fill your container 2/3 of the way with all-purpose Potting Soil.
2. Mix some fertilizer into the soil in the container.  
We have always had exceptional results with *E.B. Stone Sure Start*.
3. Moistening the soil so that it is damp is an important step if your potting soil is old or on the dry side.  
Most fresh bags of soil should take up water evenly when you water the plants in.
4. Plant your container.  
It helps to gently loosen the root of each plant to enhance root development.
5. Fill the nooks and crannies with moist potting soil.
6. Water your newly planted container thoroughly and enjoy!

Substitutions:

Sometimes you cannot find the exact cultivated variety we have listed above. Luckily there are substitutions that will offer a similar or even preferred look. A purple flowering Angelonia would offer a friendly substitute for the Solanum. Fancy leaf geraniums will work in place of the Prince Rupert. Sweet potato vine or Verbena can fill in for the spillers in this container.

Care and Maintenance:

The plants in this container will thrive with up to 6 plus hours of sun. Water when slightly dry, being careful not to over water. Fertilize twice a month with a liquid fertilizer such as a fish and kelp blend. All plants in this design are annual in the Portland area.
