

Recipe Card for the
Container Design of the Month
Designed by Drew Waldman at Portland Nursery

March

Design of the Month

Climbing into Spring

1. *Clematis armandii* 'Snowdrift'
2. *Saxifraga* "Touran neon rose"
3. Variegated Cat Grass
4. *Ranunculus* -Dark Pink
5. *Iberis* 'Purity'

PORTLAND
NURSERY

Steps:

1. Fill your container 2/3 of the way with all-purpose Potting Soil.
2. Mix some fertilizer into the soil in the container.

We have always had exceptional results with *E.B. Stone Sure Start* and *Osmocote*.

3. Moistening the soil so that it is damp is an important step if your potting soil is old or on the dry side.

Most fresh bags of soil should take up water evenly when you water the plants in.

4. Plant your container.

It helps to gently loosen the root of each plant to enhance root development.

5. Fill the nooks and crannies with moist potting soil.
6. Water your newly planted container thoroughly and enjoy!

Substitutions:

Sometimes you cannot find the exact cultivated variety we have listed above. Luckily there are substitutions that will offer a similar or even preferred look. Other evergreen vines would also make a nice centerpiece. *Ranunculus* come in a wide variety of colors.

Care and Maintenance:

The plants in this container will thrive with part to full sun and will bloom for months in spring. Water when slightly dry, being careful not to over water. Gently scratch in granular all-purpose fertilizer into the soil surface in late spring. For continuing color replace the *Saxifrage* and *Ranunculus* with summer bloomers to continue this great look for the new season.
