APPLE VARIETIES FOR 2026

AKANE	**Self-fertile. Disease Resistant!** Very hardy variety, with bright red fruit, juicy, crisp, white flesh and tart, sprightly flavor. Good for drying, dessert, and storing.
AMBROSIA	Discovered in British Columbia, probably a cross between Red and Golden Delicious. The crisp, sweet flesh is especially low acid, stores quite well. Best for fresh eating.
ARKANSAS BLACK	Medium, near black fruit with waxy skin. Crisp and juicy! Good fresh, for cooking, and for cider. Excellent keeper. Triploid. Ripens late Oct.
ASHMEAD'S KERNEL	The small fruit has a robust, rich, sweet-tart flavor. Good for cooking, baking, cider, and keeping. Ripens late Sept-Oct.
BRAEBURN	Medium to large fruit. Yellow skin with orange-red blush. Crisp, tangy flavor, very high quality. Needs fruit thinning. Fruit susceptible to sunburn. Triploid.
CHEHALIS	**Self-fertile**. Large yellow fruit with a pink blush hiding crisp juicy flesh. Good baking and eating apple, resistant to scab.
COX'S ORANGE PIPPIN	**Self-fertile** heirloom has orange fruit with red stripe. Firm, sweet, tart and juicy. Excellent all purpose. Ripens mid season.
EARLY PINK LADY	**Self-fertile.** Oblong, yellow fruit flushed pink with fine, white flesh that resists browning. Very long keeper, ripens early Sept.
ENTERPRISE	**Disease Resistant!** Med-large, crisp, deep red fruit with delicious, spicy, sweet-tart flavor. Great all purpose. Good keeper at 5-6 months, ripens mid-October.
FUJI	Tall, rectangular, medium-sized apple. Crisp, juicy, slightly sub acid flesh with superb texture. Good keeper. Vigorous, productive, bushy tree. Ripens Sept.-Oct.
GALA	**Semi self-fertile**, better with pollinizer. Medium fruit with bright yellow skin heavily striped orange-red. Yellow flesh is firm, crisp and very juicy. Good keeper. Large, vigorous tree. Ripens in Sept.
GOLDEN SENTINEL	Columnar apple. Yellow, sweet and juicy fruit that ripens late Sept. Very productive. 8-10' x 18". Great for containers!
GOLDRUSH	Medium-small fruit with golden skin, a great keeper, Crunchy tangy and juicy fruit, good for fresh eating and cider, Scab resistant.
GRANNY SMITH	**Self-fertile.** Large bright green apple with tart and juicy flavor. Good keeper. Excellent for cooking and baking. Very vigorous, heavy bearing tree. Needs a hot location to ripen in the PNW. Ripens in Nov.
GRAVENSTEIN	Large, round, fruit with red stripes. Crisp, juicy, fine grained, yellowish-white flesh is known for its great flavor. Excellent all purpose. Triploid. Ripens in Aug.
HONEYCRISP	Large, red, mottled apple with juicy, crisp, cream flesh. Extended harvest up to three weeks, and a good keeper. Late bloomer. Ripens late September.
LIBERTY	Most disease resistant variety ever developed! Medium-sized, shiny fruits best for fresh eating, cooking, canning, and keeping. Very vigorous. Ripens Oct. **Disease Resistant!**
LUCY GEM	**NEW** variety, with yellow skin and colorful pink flesh. Crisp and juicy, with complex flavor notes of berries. Ripens in September.
LUCY GLO	**NEW** variety, with med-large, conical fruit, yellow skin and colorful pink flesh. Crisp and juicy, with tart-sweet flavor. Ripens in September.
NORTHPOLE	Columnar variety. Very large, bright red, Macintosh-type fruit that is crisp, juicy and aromatic. Very productive, attractive and great for fresh eating!
PINK LADY	**Self-fertile**. Oblong, yellow fruit flushed pink with fine, white flesh that resists browning. Very long keeper, ripens late Sept.
PRISTINE	**Disease Resistant!** Glossy yellow fruit with high sugar content, great for fresh eating, cooking, sauce, and storing. Ripens in July.
ROXBURY RUSSET	Large fruit, green with brown russet. Firm, yellow flesh with high sugar content. Excellent for cider. Blooms late.
SCARLET SENTINEL	Columnar variety. Medium-sized, red apple with dense, juicy flesh. Excellent for small spaces and containers. Ripens mid-Oct.
SPARTAN	**Self-fertile**, but better with pollinator. White, crisp, juicy, medium-sized fruit. Highly aromatic, superb for fresh eating. Good keeper. Ripens mid-Oct.
SPITZENBERG	Medium to large, red-skinned fruit dotted with yellow. Flesh is crisp, fine-grained, tangy and spicy. Excellent for desserts. Good keeper. Ripens Nov.
SWEET SIXTEEN	Big crisp red striped fruit is super sweet with complex flavor; tasters mention nuttiness, vanilla, anise, nutmeg, and cherry candy flavors.
URBAN BLUSHING DELIGHT	**NEW** columnar variety. Firm texture, juicy and sweet. Med-size, red blushed green fruit ripens mid-September. Good disease resistance.
URBAN TANGY GREEN	**NEW**, columnar variety. Firm, tart, sub-acid flavor similar to Granny Smith. Med-size, lime green fruit ripens mid-September. Good disease resistance.
WHITE ICICLE	**NEW**, columnar variety, with snow white flowers followed by large, pale green fruit with crisp, juicy, flavorful, bright white flesh. Good scab resistance.

Our most disease resistant varieties!

Our most heat tolerant and low-chill varieties.
